## PROFESSIONAL SUMMARY

Software engineer with experience building web applications and APIs, deploying cloud infrastructure, and supporting business technology. Work spans Python and JavaScript development, AWS and DevOps, IT systems, POS implementation, and data/GIS projects. Bring a practical approach to debugging, documentation, testing, and delivering maintainable solutions for teams and clients.

## CORE SKILLS

**Software & APIs:** Python, JavaScript, FastAPI, Django/DRF, Node.js, Express, React, REST APIs, authentication, integrations
**Cloud & DevOps:** AWS (Lambda, ECS, S3, CloudFront, IAM, API Gateway, CloudWatch), Terraform, AWS SAM, Docker, CI/CD
**Databases & GIS:** PostgreSQL, SQLAlchemy, MongoDB, DynamoDB, PostGIS, GeoDjango, QGIS, geospatial analysis
**Operations & quality:** Git, GitHub Actions, Linux, Bash, pytest, Playwright, debugging, IT support, POS deployment, documentation

## PROFESSIONAL EXPERIENCE

**Software Engineer** | Afarinick Company Limited — Sep 2026 – Present
- Develop and maintain application architecture, backend services, and business-system modules; investigate issues and support ongoing improvements.
- Contribute to code quality, system maintenance, and reliable delivery in a collaborative engineering environment.

**Software Engineering Team Lead (Internship)** | AmaliTech — Aug – Sep 2026
- Led intern development cycles, coordinated task breakdowns, reviewed pull requests, and supported sprint delivery.
- Built backend APIs and deployment pipelines; worked through application and production debugging issues.

**Cloud & DevOps Engineer (Part-time)** | One Health Global Technologies — Jul – Sep 2026
- Provisioned reproducible AWS infrastructure with Terraform across EC2, IAM, S3, VPC, Lambda, CloudWatch, and ECS Fargate.
- Automated Docker-based deployment with GitHub Actions and configured application logging and alerts.

**Backend Python Developer (Internship)** | M365Connect — Dec 2024 – Mar 2025
- Developed Django REST Framework APIs for data exchange across three client web applications.
- Automated structured data collection in Python and improved ORM queries for faster execution.

**IT Technician** | KNUST, Kumasi — Oct 2024 – Sep 2025
- Delivered Tier 1/2 support to 200+ staff and students, worked with Active Directory across five departments, and produced 40+ technical procedures.

**POS Technician & IT Support** | Lerato Consult — Nov 2022 – Dec 2024
- Installed and configured POS systems for 10+ retail and hospitality clients; documented 50+ troubleshooting and support procedures.

**Data Science Intern** | HubbleMind — Nov – Dec 2024
- Prepared 5,000+ health records and trained machine-learning classifiers, achieving 88% accuracy in the reported project evaluation.

## SELECTED PROJECT PORTFOLIO

Production-minded engineering examples and selected applied projects. Full case studies: devedmund.vercel.app

**Multi-Tenant File Service API** | FastAPI • AWS • PostgreSQL • Terraform • Code

Built a tenant-isolated file service using presigned S3 URLs, scoped database queries, and hashed API keys. Deployed with private ECS Fargate services, RDS PostgreSQL, and an ALB.

Defined 12 Terraform modules across development, staging, and production; automated linting and tests in CI (82% reported coverage).

**YɛnCare – Clinic Booking & Virtual Queue** | React • Express • MongoDB • CI • Code

Team-built clinic booking and live queue platform with reference-code check-in, staff role permissions, and rate limiting.

Implemented automated validation with 468 backend tests and end-to-end browser tests; contributed 121 commits to the team project.

**Event-Connect – Serverless Registration** | AWS SAM • Lambda • CloudFront • DynamoDB • Code

Designed a serverless registration workflow protected by CloudFront, AWS WAF, and a Lambda origin-secret check; used DynamoDB, SES, and SNS for ticketing and notifications.

Built an infrastructure template with 23 declared resources and 19 automated tests using moto.

**Ghana Cocoa Belt – Geospatial Mapping** | QGIS • PyQGIS • GDAL • Code

Mapped 20 synthetic cocoa plots across nine districts in Western North, Ghana; validated polygon geometry and calculated areas in EPSG:32630.

Created a reproducible map workflow. Tree-cover-loss layers provide geographic context, not a compliance determination.

**KeyLess – AWS Security CLI** | Python • AWS • GitHub Actions • Code

Developed a scanner for common AWS misconfigurations such as exposed credentials, public S3 access, overly broad IAM permissions, and missing budget alerts; 42 automated tests.

**Asase GIS – Web Mapping Prototype** | GeoDjango • PostGIS • Leaflet

Served synthetic parcel records from PostGIS as GeoJSON for interactive web maps; used projected coordinates for area calculations.

**KORA – Music Discovery Application** | Django • REST API • Integration

Built API-backed music discovery with on-demand streaming URL resolution; supported by automated Django and Node.js tests.

**Terraformed – Secure Static Deployment** | Terraform • AWS • GitHub OIDC

Deployed private S3 and CloudFront infrastructure using Terraform and short-lived CI credentials instead of stored AWS access keys.

## ADDITIONAL EXPERIENCE

**Data Entry & IT Support Intern** | Ghana Revenue Authority | Sep – Nov 2023 — Returns processing, records entry, and office IT support.

**Data Science & Analytics Intern** | Zidio Development | Aug – Oct 2024 — Python-based speech emotion recognition prototype.

## EDUCATION & PROFESSIONAL DEVELOPMENT

**BSc Applied Mathematics** | Kwame Nkrumah University of Science and Technology (KNUST) | 2021 – 2024

**Cloud Computing & AI Program (AWS)** | Azubi Africa | Apr – Jul 2026

## SELECTED CREDENTIALS

AWS Knowledge: Cloud Essentials • Django Web Framework – Meta • System Administration & IT Infrastructure Services – Google • The Full Stack – Meta
